Zhao, B. L. 172
Zhu, Yizu 111

Titles

A

A Novel Optical Method for the Measurement of Biomolecular Diffusion in Polymer Matrices 126
Adsorption Phenomena in Hydrophobic Interaction Chromatography 79
Affinity Cross-Flow Filtration: Experimental and Modeling Work Using the System of HSA and Cibacron Blue-Agarose 9
Affinity Separations Using Liquid Perfluorocarbon Supports: Rate Effects 132
Average Heat Transfer Coefficients In Twin Screw Extruders 158

B

Bioaffinity Separations Using Reversed Micellar Extraction 57

C

Characterization of an Immobilized Biocatalyst System for Production of Thermostable Amylase 31
Concentration of Bioparticles by Axial Migration in Laminar Flow 105
Construction and Characterization of a Temperature-Sensitive Expression System in Recombinant Yeast 18
Continuous Cell Debris Filtration Using A Magnetically Stabilized Fluidized Bed 98
Crosslinking Rates of Thermally Preset Alginate Gels 75

D

Displacement Chromatography of Proteins Under Elevated Flowrate and Crossing Isotherm Conditions 92

E

Effects of Growth Conditions on Carbon Utilization and Organic By-Product Formation in B.subtilis 63
Endothelial Volume and the Hydraulic Conductivity of Microvessels During Altered Pressure States 27

G

Gelatinization Kinetics Of Starch By Using Raman Spectroscopy 172
Growth Kinetics of Strawberry Cell Suspension Cultures in Shake Flask, Airlift, Sirred-Jar And Roller "Bottle Bioreactors" ..137

H

High-Level Expression and Efficient Purification of Recombinant Somastostatin in Escherichia Coli 40

I

Ice Cream Components Prepared With Ultrafiltration and Reverse Osmosis Membranes 46

M

Metobolic Pathway Rates and Fluorescence Measurements During Bioconversions By Non-Growing Immobilized Clostridium Acetobutylicum 144
Microcalorimetry, Fluorescence, And Fractionation Study Of Yeast Alcohol Dehydrogenase: Stability And Heterogeneity Implications 164

P

Phase Partitioning of Biomolecules: Solubilities of Amino Acids ..111
Process Implications for Metal-Dependent Immunoaffinity Interactions 119

R

Reaction Rates for the Production of Polyphenylalanine and Polyserine by Solid Phase Peptide Synthesis with Low Excesses of the Symmetrical Anhydride 51
Response Of A Mouse Hybridoma Cell Line To Heat, Shock, Agitation, and Sparting 174

S

Stability of Cytochrome P-450 Enzyme and the Dehalogenation Activity in Resting Cultures of Pseudomonas putida PpG 786 70

T

The Influence of Shear Stress on Cultured Vascular Endothelial Cells: The Stress Response of an Anchorage-Dependent Mammalian Cell 01
The Solubility of Amino Acids in Mixtures of Water and Aliphatic Alcohols 89

Subjects

A

Adsorption phenomena 79
Altered pressure states 27
Alginate gels, thermally preset . . 75
Aliphatic alcohols, mixture of water and 89
Amino acids, solubility of 89, 111
Axial migration 105

B

B. sublills, by-product formation in 63
Bioaffinity separations 57
Biomolecules, phase partitioning of 111
Biomolecular diffusion in polymer matrices 126
Bioparticles, concentration of . . . 105
Bioreactors, shake flask, airlift, stirred-jar, and roller bottle . . 137

C

Carbon utilization 63
Cells
debris filtration 98
endothelial 1
mammalian 1
mouse hybridoma 174
strawberry 137
vascular endothelial 1
Cibracron blue-agarose 9
Clostridium acetobutylicum, non-growing immobilized 145
Chromatography
hydrophobic interaction 79
displacement 92
Cross-flow filtration 9
Crossing isotherm conditions 92
Cultured vascular endothelial cells 1
Cytochrome P-450 enzyme 70

D

Dehalogenation activity 70

E

Endothelial Cells, cultured vascular 1
Elevated flowrate, proteins under 92
Escherichia coli, somatostatin in . 40

F

Filtration, cross-flow 9
Fluidized bed, magnetically stabilized 98
Fluorescence measurements during bioconversions 144

G

Gelatinization kinetics of starch . 172

H

Hydraulic conductivity of microvessels 27
Human serum albumin (HSA) 9
Hydrophobic interaction chromatography 79

I

Ice cream components 46
Immobilized biocatalyst system . . 31
Immunoaffinity interactions, metal-dependent 119

L

Laminar flow, axial migration in 105
Liquid perfluorocarbon supports 132

M

Mammalian cell, anchorage-dependent 1
Membranes, reverse osmosis 46
Metabolic pathway rates 144
Microvessels, hydraulic conductivity of 27
Mouse hybridoma cell, response to heat, shock, agitation and sparging 174

P

Peptide synthesis, solid phase . . . 51
Polymer matrices, biomolecular diffusion in 126
Polyphenylalanine, production of 51
Polyserine, production of 51
Proteins, displacement chromatography of 92
Pseudomonas pudita P_rG 786, resting cultures of 70

R

Ramon spectroscopy, using 172
Recombinant yeast, expression system in 18
Reversed micellar extraction 57
Reverse osmosis membranes 46

S

Shear stress, influence of 1
Stress response 1
Symmetrical anhydride 51

T

Thermostable amylase 31
Twin screw extruders, heat transfer coefficients in 158

Y

Yeast alcohol dehydrogenase, study of 164
